Magnetic stirrer type of pharmaceutical laboratory equipment. Used for mixing liquid pharmaceutical and biological products in a laboratory. The special design of magnetic mixers avoids friction when mixing liquids.

Blister with capsules the kind of packaging that maximizes the storage of hard gelatin capsules with powders and soft gelatin capsules with oils, from the effects of the environment. The main means of affecting the capsule shell is moisture. Being in the individual cell of the blister, the gelatin capsule is maximally protected.

Vial cap a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to screw caps for the capping of plastic and glass bottles with medicines.

Tube filling machine type of pharmaceutical process equipment. Used for filling plastic or aluminum tubes with various creams and ointments for pharmaceutical and cosmetic use. The process can be automated by feeding empty tubes, filling a certain dose of material and sealing the edge of the tube.

Manufacture of ointments the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.

Granulator type of pharmaceutical equipment used for granulation of powder materials. The task of using a granulator in the formation of spherical strong granules.

According to the technological principle of operation, the granulators are divided into two groups: with the moisture of the powder and without humidification.

Filling a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to the metered packing of liquids in various plastic and glass containers.

Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings.

Lyophilization the technological process in the pharmaceutical production of drugs. High-technological drying of liquid and solid materials, followed by preservation of the original structure in dried materials, physical and chemical characteristics, biological activity.

Pharmaceutical company from Republic of Kazakhstan.
