Automatic cardboard machine for packaging blisters with tablets in cardboard boxes Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Packing machine type of pharmaceutical packaging equipment. Used for packaging of finished pharmaceutical products. Used in the composition of automatic lines in the final stage or separately. Models differ in the materials and performance used.

Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings.

Powder compactor type of pharmaceutical equipment for compaction of dry powder with subsequent production of granules. In cases of impossibility of wet granulation in a compactor, plates are dried from a dry powder, and then destroyed. As a result, a pellet is obtained which increases the fluidity and flowability of the granules.

Meltdown analyzer type of laboratory pharmaceutical equipment for analysis of the melting process of suppositories. The device has a magnetic pump to create circulation of the water flow, evenly distributes it through the system, and the «water bath» maintains the same temperature in the system.

Mixing of powders a technological term used in the pharmaceutical production of medicines. Used for the process of mixing several bulk powdered pharmaceutical and cosmetic products into a homogeneous mass.

Aluminium foil type of packaging material for pharmaceutical blister equipment. Used in the formation of blisters for pharmaceutical and medicinal products. Thin film of aluminum with a layer of thermo-weldable lacquer.

Rolling the technological term used in the pharmaceutical production of granules. The pre-moistened powder is placed on a high-speed rotating disc on which incisions are formed. The principle of rolling a powder into a uniform granule size is used, which requires subsequent drying.

Dissolution analyzer type of laboratory equipment that is used to control the disintegration of solids of drugs in the laboratory. The equipment controls the temperature level, the time and the speed of the agitator revolutions in the tanks.

Glass ampoules type of individual package for liquid pharmaceutical preparations. Used for bottling and storing medicines in a sterile state, has an elongated thin neck and thin glass walls.

Fluidized bed a technological term used in the pharmaceutical industry. Refers to the fluidized bed granulation process, represents a mixture of liquid and powder, resulting in perfectly spherical pellets. A fluidized bed, the best way to apply a multi-layer shell to the pellets.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
