Cartonage a professional term – short for a cardboard machine, also refers to the process of packaging blisters, tubes, suppositories and other pharmaceutical products in a cardboard box. Cartoning machine type of pharmaceutical packaging equipment. Used packaging of various goods in cardboard boxes. In addition to embedding goods from cardboard machines, there is a function of the tab of paper instructions. Blister it type of pharmaceutical packaging. Usually, PVC roll materials and aluminum foil are used. Blisters have cells of various sizes and shapes. The number of cells in the blister is determined by the manufacturer. Cells are filled with tablets, capsules, pastes. After filling the cells, the blisters are automatically sealed with aluminum foil or other materials. Forms of blisters and their sizes are made according to the design of clients.
