Hydraulic press type of pharmaceutical equipment. Used for the production of industrial batches of tablets of large weight and size. In addition to hydraulic presses, there is a large amount of tablet equipment: rotary tablet presses and pneumatic models of tablet presses. Hydraulic presses create a maximum compression force of several tens of tons.

Sublimator type of pharmaceutical process equipment. Used for the production of dehydration and drying of food, pharmaceutical and biological products. Moisture in a vacuum condenses and freezes. There are laboratory models for research and industrial installations.

Pharmaceutical company from State of Israel.

Pressing the technological process of the production of tablets from powder materials, in which the raw material is compressed in the press forms of a tablet press. The best effect for pressing gives the introduction of a glue additive in the tablet composition. There is direct pressing and pre-pressing.

Tablet Counter type of pharmaceutical packaging equipment. It is used for automatic packing of tablets, sweets and dragees into plastic containers. Packing is carried out by the number of pieces.

Shredder type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different performance, differing in the principle of operation.

Closure of vials the technological term used in the pharmaceutical production of liquid medicines. The equipment used automatically delivers bottles and clogs the neck of the bottle with rubber stoppers and aluminum caps, as well as screw caps.

Mixer pharmaceutical a technological term used in the pharmaceutical production of medicines. Used for various models of mixers for mixing loose powder and liquid pharmaceutical and cosmetic products.

Packing in a blister pack the technological process in the pharmaceutical production of drugs. Automated process of formation of a cellular plastic package with the filling of cells with tablets, gelatin capsules or other dosage forms, followed by sealing with aluminum foil or cardboard.
