Pharmaceutical company from Republic of Poland.

Screw conveyor type of pharmaceutical equipment. Used for remote transfer of granular and powder raw materials from storage tanks to process equipment.

Hydraulic press type of pharmaceutical equipment. Used for the production of industrial batches of tablets of large weight and size. In addition to hydraulic presses, there is a large amount of tablet equipment: rotary tablet presses and pneumatic models of tablet presses. Hydraulic presses create a maximum compression force of several tens of tons.

Plastic box the technological term used in the pharmaceutical packaging of medicines. It is used by specialists in relation to materials for the best preservation of medicines.

Applicable for all types and forms of plastic containers.

Pharmaceutical company from Republic of Peru.

Logo on the capsule the technological process of marking in the pharmaceutical production of gelatin capsules. The manufacturer's logo is printed on the surface of the capsule by cold printing. At the same time, food colors and special equipment are used.

Granulation of powders the technological process in the pharmaceutical production of drugs. There are two basic needs for granulation, where the pellets are the final product or granulation improve the flowability of the powder in the process. The decision on the need for granulation is taken when it is not possible to use powders with a larger fraction.

Blister it type of pharmaceutical packaging. Usually, PVC roll materials and aluminum foil are used. Blisters have cells of various sizes and shapes. The number of cells in the blister is determined by the manufacturer. Cells are filled with tablets, capsules, pastes. After filling the cells, the blisters are automatically sealed with aluminum foil or other materials. Forms of blisters and their sizes are made according to the design of clients.

Lyophilizer type of pharmaceutical process equipment. Used for the production of dehydration and drying of food, pharmaceutical and biological products. Moisture in a vacuum condenses and freezes. There are laboratory models for research and industrial installations.
