V-shaped mixer type of pharmaceutical process equipment. Used for mixing loose powder pharmaceutical and biological products. A special design feature of the powder mixer allows to avoid dead zones when mixing.

Blister with tablets the type of packaging that maximizes the storage of tablets from powder from the effects of the environment. The main means of affecting the tablet is moisture. In the individual cells of the blisters, the tablets are maximally protected.

Cellophanning the technological process of packaging pharmaceutical products in the production of medicines. It is used in the final stage of the cardboard machine. Finished boxes are wrapped with a transparent thin film to preserve the presentation of the packaging.

Hardness analyzer type of laboratory pharmaceutical equipment for measuring the hardness of tablets and granules. The device is equipped with a high-precision sensor that monitors hardness and displays data on the front panel. Testing the hardness of tablets is continuous.

Lyophilizer type of pharmaceutical process equipment. Used for the production of dehydration and drying of food, pharmaceutical and biological products. Moisture in a vacuum condenses and freezes. There are laboratory models for research and industrial installations.

Quality of tablets the technological term used in the pharmaceutical production of tablets. Ready-made tablets always go through several stages of preliminary testing, before mass production starts. Weight, thickness, strength, dissolution time, presence of damages and impurities are monitored.

Descaling tablets type of pharmaceutical process equipment. Used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses.

Pharmaceutical company from Republic of Colombia.

Pharmaceutical machine type of equipment used in the pharmaceutical industry for the manufacture of medicines.

Shelf life a technological term used in the pharmaceutical production of medicines. It is used for applying by any means control information about the release date and the date of consumption of pharmaceutical and cosmetic products.
