Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings. Granulator type of pharmaceutical equipment used for granulation of powder materials. The task of using a granulator in the formation of spherical strong granules. According to the technological principle of operation, the granulators are divided into two groups: with the moisture of the powder and without humidification. Granulation of powders the technological process in the pharmaceutical production of drugs. There are two basic needs for granulation, where the pellets are the final product or granulation improve the flowability of the powder in the process. The decision on the need for granulation is taken when it is not possible to use powders with a larger fraction. Equipment from China. China is the leader in the production of pharmaceutical equipment in the world. The ratio of acceptable cost and quality makes obvious the choice of equipment produced in this country.
