Paper instruction a technological term used in the pharmaceutical production of medicines. It is used by specialists in relation to a paper sheet with information about the intended use, the way of application and the side effects of drugs. Cartonage a professional term – short for a cardboard machine, also refers to the process of packaging blisters, tubes, suppositories and other pharmaceutical products in a cardboard box. Cartoning machine type of pharmaceutical packaging equipment. Used packaging of various goods in cardboard boxes. In addition to embedding goods from cardboard machines, there is a function of the tab of paper instructions. Blister packing machine type of pharmaceutical packaging equipment. Used for the automatic formation of a cellular packaging made of roll PVC material. The machine automatically fills the cells with the product – tablets, capsules, dragees, liquids and pastes. After filling the cells, the equipment seals the surface of the blisters with aluminum foil or other heat-sealing films.
