Packing in a box the technological process in pharmaceutical production. Automatic process of layout in ready-made cardboard boxes of various dosage forms and medical products.

Screw conveyor type of pharmaceutical equipment. Used for remote transfer of granular and powder raw materials from storage tanks to process equipment.

Filling equipment type of pharmaceutical equipment. Used in pharmaceutical production for industrial dosing of pharmaceuticals. Weight and bulk packing are used, where a portion of the product is weighed or measured by a serving glass.

Water treatment a technological term used in the pharmaceutical production of medicines. Special means for water treatment used in production lines of medicine production. There are both separate lines and individual units.

Blistering the technological process of packaging pharmaceutical products in durable individual packaging made of PVC and aluminum foil. Blister packs are formed during packaging heating, sterilizing at the same time. It is one of the popular types of full-fledged drug packaging.

Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings.

Vacuum packaging the technological process of packaging pharmaceutical products by removing air from any containers. Used for plastic bags, glass and plastic bottles and bottles.

Dragee machines type of pharmaceutical process equipment. Used for the formation of multi-layered pellets, as well as for applying decorative and protective coating to the surface of tablets.

Tea Packaging a technological term used in pharmaceutical production and tea packaging. Various types of packaging materials are used for the weight and volume dosage of each package.

Production of creams the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.
