Capsulator type of pharmaceutical equipment. Used to automatically fill gelatin capsules with powders, or to form capsules of gelatinous materials, followed by filling with oil or fat. Capsules can be referred to as manual semi-automatic machines, as well as automatic equipment of high productivity.

Shredder type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different performance, differing in the principle of operation.

Production of creams the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.

Aluminum cap a technological term used in the pharmaceutical production of medicines. It is a lid formed from thin aluminum tape. It is used to fix rubber stoppers on penicillin bottles after the filling process. Necessarily, the edges of the caps are wound using special equipment.

Blistering the technological process of packaging pharmaceutical products in durable individual packaging made of PVC and aluminum foil. Blister packs are formed during packaging heating, sterilizing at the same time. It is one of the popular types of full-fledged drug packaging.

Label of tea bag the technological term used in the pharmaceutical production of tea bags. It is used by specialists with respect to a paper label, which is attached to a sachet of filter paper on a string.

Condom packaging the technological process in the pharmaceutical production of medical products. Automatic process of layout in condom cells with subsequent packaging in metallized films, for individual and group packaging.

Melting analyzer type of laboratory equipment for determining the melting point of drugs, impurities, dyes used in pharmaceutical production of drugs. The temperature of the melting point of the substance is controlled when it is converted into a liquid state from a solid. Such testing is a convincing way of detecting impurities in the substance.

Pump dispenser type of pharmaceutical process equipment. Used for dosed supply of liquid materials in the manufacture of drugs. Dosers can work with liquids and viscous pastes, gels, ointments.

Strain analyzer type of laboratory pharmaceutical equipment for determination of gelatin hardness. The device has an accurate photoelectric converter for automatic calculation of time and viscosities.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
