Homogenizer with water jacket heating for the preparation of cream and liquids in the pharmaceutical industry Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Company CEO Mr. Roman Tsibulsky

Quality of tablets the technological term used in the pharmaceutical production of tablets. Ready-made tablets always go through several stages of preliminary testing, before mass production starts. Weight, thickness, strength, dissolution time, presence of damages and impurities are monitored.

Production of creams the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.

Viewing table type of pharmaceutical process equipment. Used for the production of visual quality control of tablets and capsules, as well as inspection of vials and ampoules for the presence of foreign inclusions and glass cracks.

Encapsulation the technological process of production of pharmaceutical products. Encapsulation is associated with placing powders or granules in hard gelatin capsules or placing oils in suture and seamless gelatin capsules.

The fluidized bed a technological term used in the pharmaceutical industry. It refers to the process of granulation in a fluidized bed, represents a mixture of liquid and powder, resulting in perfectly spherical granules. The fluidized bed is the best way to create a multilayer pellet.

Preparation of gelatin the technological process of preparation of pharmaceutical raw materials in the production of gelatin capsules. Gelatin in the form of a powder is mixed with hot water and glycerin, while adding preservatives. The resulting viscous mass forms the shell of the capsules.

Labeling the technological process of marking pharmaceutical products in the production of medicines. It is used on vials, bottles, boxes, ampoules with medicines. Labels are divided into self-adhesive and glue.

Hydraulic press type of pharmaceutical equipment. Used for the production of industrial batches of tablets of large weight and size. In addition to hydraulic presses, there is a large amount of tablet equipment: rotary tablet presses and pneumatic models of tablet presses. Hydraulic presses create a maximum compression force of several tens of tons.

Pharmaceutical equipment automatic lines and individual machines that are used in the manufacture and packaging of medicines in the form of tablets, capsules, ointments,

suppositories, dragees, briquettes, tinctures, decoctions, syrups, granules, powders, drops and potions.

Pharmaceutical vacuum cleaner type of pharmaceutical process equipment. Used to collect waste, in the form of dust, during tableting and encapsulation of powder materials. Often has the opportunity to reuse the collected powder.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
