How It's Made? Using pharmaceutical equipment

Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Company CEO Mr. Roman Tsibulsky

Condom packaging the technological process in the pharmaceutical production of medical products. Automatic process of layout in condom cells with subsequent packaging in metallized films, for individual and group packaging.

Vacuum conveyor type of pharmaceutical equipment. It is used for remote transfer of granular and powder raw materials from containers to bunkers of process equipment.

Assembly line type of pharmaceutical auxiliary equipment. It is used in conveyors for the remote transfer of granular and powder raw materials from containers to bunkers of process equipment.

Analytical equipment it is very important to control the quality of raw materials and finished medicines in pharmaceutical production. Using laboratory research, we follow the indications of the moisture level, the melting time, the transparency, the decay and dissolution time, the quantitative composition, melting, the parameters of hardness, thickness, and ductility.

Thermal printer type of pharmaceutical equipment for marking. Used for printing with special ink digital and text data on the batch number of products, the date of issue and the expiration date on the packaging of finished medicines.

Cellophane machine type of pharmaceutical packaging equipment. Used for wrapping cellophane film cartons to pharmaceutical and medicinal products. There are many types of similar equipment with different capacities.

Blister production the process occurs in automatic and semi-automatic blister machines. Used roll materials PVC and aluminum foil. During heating on the PVC tape, cells are formed which are automatically filled with medicinal products, the finished blisters are sealed with aluminum foil on top. The foil is pre-applied with information about the products. The functions of the blister machine allow the application of the embossing method and the batch number.

Pharmaceutical company from Republic of Croatia.

Tabletpress type of pharmaceutical equipment. Used for the automatic production of tablets by pressing in molds of tablet mass. There is a large amount of tablet equipment: laboratory tablet presses, rotary tablet presses, hydraulic and pneumatic models of tablet presses.

Vacuum packaging the technological process of packaging pharmaceutical products by removing air from any containers. Used for plastic bags, glass and plastic bottles and bottles.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
