Labeling machine type of pharmaceutical packaging equipment. Used for labeling in automatic and semi-automatic mode on pharmaceutical and medicinal products. There are many types of similar equipment with different capacities. Self-adhesive labels a technological term used in pharmaceutical production. It is a roll material with a paper or plastic backing, an adhesive layer on one side, and an image printed on the other side of the printer. Thermal printer type of pharmaceutical equipment for marking. Used for printing with special ink digital and text data on the batch number of products, the date of issue and the expiration date on the packaging of finished medicines. Shelf life a technological term used in the pharmaceutical production of medicines. It is used for applying by any means control information about the release date and the date of consumption of pharmaceutical and cosmetic products.
