Water treatment a technological term used in the pharmaceutical production of medicines. Special means for water treatment used in production lines of medicine production. There are both separate lines and individual units.

Tablet Polisher type of pharmaceutical process equipment. Used for mechanical polishing of the surface of tablets after tableting and pressing in rotary tablet presses. Pharmaceutical company from Republic of Mozambique.

Tabletpress type of pharmaceutical equipment. Used for the automatic production of tablets by pressing in molds of tablet mass. There is a large amount of tablet equipment: laboratory tablet presses, rotary tablet presses, hydraulic and pneumatic models of tablet presses.

Analytical equipment it is very important to control the quality of raw materials and finished medicines in pharmaceutical production. Using laboratory research, we follow the indications of the moisture level, the melting time, the transparency, the decay and dissolution time, the quantitative composition, melting, the parameters of hardness, thickness, and ductility.

Filling a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to the metered packing of liquids in various plastic and glass containers.

Vacuum conveyor type of pharmaceutical equipment. It is used for remote transfer of granular and powder raw materials from containers to bunkers of process equipment.

Laminated paper type of packaging material for pharmaceutical packaging equipment. It is used in the formation of soft individual cell packs of tablets. Combined material of paper and polyethylene film.

Packing in a blister pack the technological process in the pharmaceutical production of drugs. Automated process of formation of a cellular plastic package with the filling of cells with tablets, gelatin capsules or other dosage forms, followed by sealing with aluminum foil or cardboard.

Cellophanning the technological process of packaging pharmaceutical products in the production of medicines. It is used in the final stage of the cardboard machine. Finished boxes are wrapped with a transparent thin film to preserve the presentation of the packaging.
