Automatic labeling machine for sticking self-adhesive labels on penicillin vials and ampoules Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Company CEO Mr. Roman Tsibulsky

Laboratory press type of pharmaceutical equipment. Used in laboratories for testing experimental batches of tablets, by pressing in molds of tablet mass. In addition to laboratory presses, there is a large amount of tablet equipment: rotary tablet presses, hydraulic and pneumatic models of tablet presses.

Vacuum conveyor type of pharmaceutical equipment. It is used for remote transfer of granular and powder raw materials from containers to bunkers of process equipment.

Suppository line type of pharmaceutical production equipment. It is used for the formation of rolls of PVC and PE tape with cells. The equipment produces an automatic filling of the suppository mass into the cells, after which it is sealed and cooled.

Sublimation the technological process in the pharmaceutical production of drugs. High-technological drying of liquid and solid materials, followed by preservation of the original structure in dried materials, physical and chemical characteristics, biological activity.

Pressing the technological process of the production of tablets from powder materials, in which the raw material is compressed in the press forms of a tablet press. The best effect for pressing gives the introduction of a glue additive in the tablet composition. There is direct pressing and pre-pressing.

Powder in bags a technological term used in pharmaceutical production. Use of roll materials: aluminum foil, laminated paper or polyethylene film, with adhesive composition for the formation of bags with subsequent filling with powder and granules.

Blister with capsules the kind of packaging that maximizes the storage of hard gelatin capsules with powders and soft gelatin capsules with oils, from the effects of the environment. The main means of affecting the capsule shell is moisture. Being in the individual cell of the blister, the gelatin capsule is maximally protected.

Pharmaceutical company from Republic of Guinea-Bissau.

Equipment from China. China is the leader in the production of pharmaceutical equipment in the world. The ratio of acceptable cost and quality makes obvious the choice of equipment produced in this country.

Production of boilies technological process of complementary feeding for fishing. From a dough-like material, balls of different diameters are formed.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
