Laboratory equipment table devices and machines for research and measurement purposes. And also for testing and analytical work. It is widely used in the pharmaceutical industry to develop technology in the production of pilot batches of medicinal products. Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings. Drageing the technological term used in the pharmaceutical production of tablets. Draining is the process of layer-by-layer coating on the surface of tablets and dragees. Shells perform decorative and protective functions, while various dyes and food polymeric materials are used.
