Automatic machine assembly and capping plastic syringes Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

The fluidized bed a technological term used in the pharmaceutical industry. It refers to the process of granulation in a fluidized bed, represents a mixture of liquid and powder, resulting in perfectly spherical granules. The fluidized bed is the best way to create a multilayer pellet.

Hard gelatin capsule type of pharmaceutical products. Stable thin-walled gelatin bowls made of two parts, bases and lids. They are used for packaging grains and powdered medicines. Solid capsules have standard sizes and are subdivided into numbers 000,00,0,1,2,3,4.

Cartonage a professional term – short for a cardboard machine, also refers to the process of packaging blisters, tubes, suppositories and other pharmaceutical products in a cardboard box.

Tablet Press type of pharmaceutical equipment. Used for the automatic production of tablets by pressing in molds of tablet mass. There is a large amount of tablet equipment: laboratory tablet presses, rotary tablet presses, hydraulic and pneumatic models of tablet presses.

Pharmaceutical equipment automatic lines and individual machines that are used in the manufacture and packaging of medicines in the form of tablets, capsules, ointments, suppositories, dragees, briquettes, tinctures, decoctions, syrups, granules, powders, drops and potions.

Capsule counter type of pharmaceutical packaging equipment. Used for automatic packing of hard and soft gelatin capsules in plastic containers. Packing is carried out by the number of pieces.

Preparation of gelatin the technological process of preparation of pharmaceutical raw materials in the production of gelatin capsules. Gelatin in the form of a powder is mixed with hot water and glycerin, while adding preservatives. The resulting viscous mass forms the shell of the capsules.

Wet Granulation the technological process of the production of granules from powder materials, in which the raw material is moistened with various liquids. The best effect is obtained by moistening with gluing agents. There are models of granulators that simultaneously moisturize and granulate the powder. It is necessary to dry and powder the finished pellets.

Freeze drying type of pharmaceutical process equipment. Used for the production of dehydration and drying of food, pharmaceutical and biological products. Moisture in a vacuum condenses and freezes. Vacuum drying allows you to rehydrate and restore the product by adding water.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
