Conveyor scales type of pharmaceutical auxiliary equipment. Used for continuous weighing of finished pharmaceutical products and rejection by weight. It is installed in some packaging lines at the final stage of control.

Condom packaging the technological process in the pharmaceutical production of medical products. Automatic process of layout in condom cells with subsequent packaging in metallized films, for individual and group packaging.

Transparency Analyzer the type of laboratory equipment necessary to measure the transparency of food and technical gelatin. The device is equipped with highly stable light sources and sensitive photoelectric receivers for better test results.

Capsulator type of pharmaceutical equipment. Used to automatically fill gelatin capsules with powders, or to form capsules of gelatinous materials, followed by filling with oil or fat. Capsules can be referred to as manual semi-automatic machines, as well as automatic equipment of high productivity.

Descaling tablets type of pharmaceutical process equipment. Used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses.

Sealed packaging the technological term used in the pharmaceutical packaging of medicines. It is used by specialists to create the best conditions for the preservation of drugs in plastic, paper and glass containers.

Filling of liquids a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to the metered packing of liquids in various plastic and glass containers.

Wet Granulation the technological process of the production of granules from powder materials, in which the raw material is moistened with various liquids. The best effect is obtained by moistening with gluing agents. There are models of granulators that simultaneously moisturize and granulate the powder. It is necessary to dry and powder the finished pellets.

Pharmaceutical company from Republic of Cuba.

Tableting Machine type of pharmaceutical equipment. Used in pharmaceutical production for the industrial release of batches of tablets, by pressing in molds of tablet mass. Also used are rotary tablet presses, hydraulic and pneumatic models of tablet presses.
