Cartoning machine type of pharmaceutical packaging equipment. Used packaging of various goods in cardboard boxes. In addition to embedding goods from cardboard machines, there is a function of the tab of paper instructions.

Blister with tablets the type of packaging that maximizes the storage of tablets from powder from the effects of the environment. The main means of affecting the tablet is moisture. In the individual cells of the blisters, the tablets are maximally protected.

Powder compactor type of pharmaceutical equipment for compaction of dry powder with subsequent production of granules. In cases of impossibility of wet granulation in a compactor, plates are dried from a dry powder, and then destroyed. As a result, a pellet is obtained which increases the fluidity and flowability of the granules.

Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings.

Blister it type of pharmaceutical packaging. Usually, PVC roll materials and aluminum foil are used. Blisters have cells of various sizes and shapes. The number of cells in the blister is determined by the manufacturer. Cells are filled with tablets, capsules, pastes. After filling the cells, the blisters are automatically sealed with aluminum foil or other materials. Forms of blisters and their sizes are made according to the design of clients.

Viewing table type of pharmaceutical process equipment. Used for the production of visual quality control of tablets and capsules, as well as inspection of vials and ampoules for the presence of foreign inclusions and glass cracks.

Packing machine type of pharmaceutical packaging equipment. Used for packaging of finished pharmaceutical products. Used in the composition of automatic lines in the final stage or separately. Models differ in the materials and performance used.

Perforated stainless steel a technological term used in the pharmaceutical production of medicines. A special kind of stainless steel, of various thickness, with a number of through holes produced industrially.

Filling a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to the metered packing of liquids in various plastic and

glass containers.
