Closure of vials the technological term used in the pharmaceutical production of liquid medicines. The equipment used automatically delivers bottles and clogs the neck of the bottle with rubber stoppers and aluminum caps, as well as screw caps.

Meltdown analyzer type of laboratory pharmaceutical equipment for analysis of the melting process of suppositories. The device has a magnetic pump to create circulation of the water flow, evenly distributes it through the system, and the «water bath» maintains the same temperature in the system.

Pharmaceutical pump type of pharmaceutical process equipment. Used to control the supply of liquid materials in the manufacture of drugs. Pumps can work with liquids and viscous pastes, gels, ointments.

Capsulator type of pharmaceutical equipment. Used to automatically fill gelatin capsules with powders, or to form capsules of gelatinous materials, followed by filling with oil or fat. Capsules can be referred to as manual semi-automatic machines, as well as automatic equipment of high productivity.

Vacuum conveyor type of pharmaceutical equipment. It is used for remote transfer of granular and powder raw materials from containers to bunkers of process equipment.

Aluminum cap a technological term used in the pharmaceutical production of medicines. It is a lid formed from thin aluminum tape. It is used to fix rubber stoppers on penicillin bottles after the filling process. Necessarily, the edges of the caps are wound using special equipment.

Ointments packaging the technological process of dispensing pharmaceutical products of paste-like consistency into individual packaging. Use plastic and aluminum tubes, as well as glass and plastic containers.

Descaling tablets type of pharmaceutical process equipment. Used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses.

Encapsulation the technological process of production of pharmaceutical products. Encapsulation is associated with placing powders or granules in hard gelatin capsules or placing oils in suture and seamless gelatin capsules.

Labeling machine type of pharmaceutical packaging equipment. Used for labeling in automatic and semi-automatic mode on pharmaceutical and medicinal products. There are many types of similar equipment with different capacities.
