Automatic equipment for dust cleaning and polishing of tablets Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Penicillin bottles the technological term used in the pharmaceutical production of liquid medicines. Glass bottles are used to dose powders, granules and liquids.

Powder compactor type of pharmaceutical equipment for compaction of dry powder with subsequent production of granules. In cases of impossibility of wet granulation in a compactor, plates are dried from a dry powder, and then destroyed. As a result, a pellet is obtained which increases the fluidity and flowability of the granules.

Dust separator type of pharmaceutical process equipment. It is used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses, as well as from the surface of hard gelatin capsules during encapsulation.

Labeler type of pharmaceutical packaging equipment. Used for labeling in automatic and semi-automatic mode on pharmaceutical and medicinal products. There are many types of similar equipment with different capacities.

Ointments packaging the technological process of dispensing pharmaceutical products of paste-like consistency into individual packaging. Use plastic and aluminum tubes, as well as glass and plastic containers.

Magnetic stirrer type of pharmaceutical laboratory equipment. Used for mixing liquid pharmaceutical and biological products in a laboratory. The special design of magnetic mixers avoids friction when mixing liquids.

Packaging of tea the technological process of dosed tea packing into group and individual packaging. For various types of tea, weight or bulk packing can be used. The tea is divided into large-leaf, medium-leaf, granules and tea dust.

Screw conveyor type of pharmaceutical equipment. Used for remote transfer of granular and powder raw materials from storage tanks to process equipment.

Moisture analyzer type of laboratory equipment for analyzing the moisture of a powder or granules. It analyzes in automatic mode the loss of weight of raw materials during drying, the analysis of humidity with the display of the studied indicators on the display.

Dragee type of pharmaceutical and food products. Dragee is formed in drageeing boilers. On the granulated sugar, various liquid materials are applied by spraying, followed by drying with hot air, if necessary, dry powder is applied to the forming dragees. Forming the dragee shell allows you to adjust the size and color of the shell.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
