Blister packing machine type of pharmaceutical packaging equipment. Used for the automatic formation of a cellular packaging made of roll PVC material. The machine automatically fills the cells with the product – tablets, capsules, dragees, liquids and pastes. After filling the cells, the equipment seals the surface of the blisters with aluminum foil or other heat-sealing films.

Packing of bottles the technological process in the pharmaceutical production of drugs. Automatic process of forming cells in plastic or cardboard packaging with filling cells with penicillin bottles with medicinal forms.

Quality of tablets the technological term used in the pharmaceutical production of tablets. Ready-made tablets always go through several stages of preliminary testing, before mass production starts. Weight, thickness, strength, dissolution time, presence of damages and impurities are monitored.

Capsule production the technological process of obtaining pharmaceutical products in the production of gelatin capsules. The term can be attributed to the process of obtaining hard gelatin capsules, as well as soft gelatin capsules (suture and seamless).

Capsulator type of pharmaceutical equipment. Used to automatically fill gelatin capsules with powders, or to form capsules of gelatinous materials, followed by filling with oil or fat. Capsules can be referred to as manual semi-automatic machines, as well as automatic equipment of high productivity.

Stainless steel tanks a technological term used in the pharmaceutical production of medicines. Made from food grade stainless steel 304 and 316 brands of tanks, tanks, cans and barrels for storing pharmaceutical raw materials and products.

Pharmaceutical company from United Mexican States.

Packing line type of pharmaceutical group packaging equipment. Used for packaging of finished pharmaceutical products. It is used in addition to automatic lines at the stage of drug packaging. Complemented in a group of individual machines with similar performance.

Granulation of powders the technological process in the pharmaceutical production of drugs. There are two basic needs for granulation, where the pellets are the final product or granulation improve the flowability of the powder in the process. The decision on the need for granulation is taken when it is not possible to use powders with a larger fraction.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
