Automatic equipment for filling hard gelatin capsules with powder in pharmaceutical production USA

Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Manufacture of ointments the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.

Seamless gelatin capsules type of pharmaceutical products. Spherical capsules with a strong gelatin shell in which various oils are placed. They are used for dosing of medicinal vegetable oils and fats. Seamless capsules have a size of 2 to 14 mm. They have the form of a sphere. Pharmaceutical company from Hashemite Kingdom of Jordan. Packaging of tea the technological process of dosed tea packing into group and individual packaging. For various types of tea, weight or bulk packing can be used. The tea is divided into large-leaf, medium-leaf, granules and tea dust.

Filling a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to the metered packing of liquids in various plastic and glass containers.

Blister packing machine type of pharmaceutical packaging equipment. Used for the automatic formation of a cellular packaging made of roll PVC material. The machine automatically fills the cells with the product – tablets, capsules, dragees, liquids and pastes. After filling the cells, the equipment seals the surface of the blisters with aluminum foil or other heat-sealing films.

Vibrating sieve type of pharmaceutical process equipment. It is used for the separation into fractions of various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities.

Analytical equipment it is very important to control the quality of raw materials and finished medicines in pharmaceutical production. Using laboratory research, we follow the indications of the moisture level, the melting time, the transparency, the decay and dissolution time, the quantitative composition, melting, the parameters of hardness, thickness, and ductility.

Homogenizer type of pharmaceutical process equipment. Used for obtaining homogeneous mixtures of liquids and solids. The speeds of the knives of mechanical homogenizers can vary. There are models of laboratory and industrial applications.

Blistering the technological process of packaging pharmaceutical products in durable individual packaging made of PVC and aluminum foil. Blister packs are formed during packaging heating, sterilizing at the same time. It is one of the popular types of full-fledged drug packaging.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
