Hard gelatin capsule type of pharmaceutical products. Stable thin-walled gelatin bowls made of two parts, bases and lids. They are used for packaging grains and powdered medicines. Solid capsules have standard sizes and are subdivided into numbers 000,00,0,1,2,3,4.

Numerator type of pharmaceutical process equipment. Used for labeling pharmaceutical and biological products by printing or embossing information on cardboard, paper, foil.

Powder compactor type of pharmaceutical equipment for compaction of dry powder with subsequent production of granules. In cases of impossibility of wet granulation in a compactor, plates are dried from a dry powder, and then destroyed. As a result, a pellet is obtained which increases the fluidity and flowability of the granules.

Pharmaceutical company from Saint Vincent and the Grenadines.

Penicillin bottles the technological term used in the pharmaceutical production of liquid medicines. Glass bottles are used to dose powders, granules and liquids.

Laboratory equipment table devices and machines for research and measurement purposes. And also for testing and analytical work. It is widely used in the pharmaceutical industry to develop technology in the production of pilot batches of medicinal products.

Suppositories a technological term used in pharmaceutical production. They are candles with medicinal substances. They are divided into rectal and vaginal candles, which have the form of a cone, a cylinder with a pointed end.

Manufacture of medicines a technological term used in the pharmaceutical production of medicines. Suitable for all types of solid and liquid forms of medicines and possible ways of their release

Pressing the technological process of the production of tablets from powder materials, in which the raw material is compressed in the press forms of a tablet press. The best effect for pressing gives the introduction of a glue additive in the tablet composition. There is direct pressing and pre-pressing.

Powder packaging the technological process of batch dosing of pharmaceutical products in powder form in individual packaging. Used plastic and aluminum containers, as well as glass and plastic containers and other packaging that provides storage. Weighed and volumetric packing of powders is used.
