Shredder type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different performance, differing in the principle of operation.

Blister production the process occurs in automatic and semi-automatic blister machines. Used roll materials PVC and aluminum foil. During heating on the PVC tape, cells are formed which are automatically filled with medicinal products, the finished blisters are sealed with aluminum foil on top. The foil is pre-applied with information about the products. The functions of the blister machine allow the application of the embossing method and the batch number.

Sealing of ampoules technological process of sealing the neck of a glass ampoule after bottling of medicinal and chemical liquids. Automatic filling and sealing machines are used, as well as laboratory desktop ampoule machines.

PVC film type of packaging material for pharmaceutical blister equipment. Used in the formation of blisters for pharmaceutical and medicinal products. Colorless, transparent plastic, thermoplastic vinyl chloride polymer.

Pharmaceutical company from Republic of India.

Descaling tablets type of pharmaceutical process equipment. Used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses.

Filling a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to the metered packing of liquids in various plastic and glass containers.

Numerator type of pharmaceutical process equipment. Used for labeling pharmaceutical and biological products by printing or embossing information on cardboard, paper, foil.

Shelf life a technological term used in the pharmaceutical production of medicines. It is used for applying by any means control information about the release date and the date of consumption of pharmaceutical and cosmetic products.

Mixer a technological term used in the pharmaceutical production of medicines. Used for all models of mixers for mixing loose powder and liquid pharmaceutical and cosmetic products.
