Aluminum cap a technological term used in the pharmaceutical production of medicines. It is a lid formed from thin aluminum tape. It is used to fix rubber stoppers on penicillin bottles after the filling process. Necessarily, the edges of the caps are wound using special equipment.

Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings.

Transparency Analyzer the type of laboratory equipment necessary to measure the transparency of food and technical gelatin. The device is equipped with highly stable light sources and sensitive photoelectric receivers for better test results.

Laboratory press type of pharmaceutical equipment. Used in laboratories for testing experimental batches of tablets, by pressing in molds of tablet mass. In addition to laboratory presses, there is a large amount of tablet equipment: rotary tablet presses, hydraulic and pneumatic models of tablet presses.

Manufacture of medicines a technological term used in the pharmaceutical production of medicines. Suitable for all types of solid and liquid forms of medicines and possible ways of their release

Laminated paper type of packaging material for pharmaceutical packaging equipment. It is used in the formation of soft individual cell packs of tablets. Combined material of paper and polyethylene film.

Perforated stainless steel a technological term used in the pharmaceutical production of medicines. A special kind of stainless steel, of various thickness, with a number of through holes produced industrially.

Dust separator type of pharmaceutical process equipment. It is used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses, as well as from the surface of hard gelatin capsules during encapsulation.

Packaging of tea the technological process of dosed tea packing into group and individual packaging. For various types of tea, weight or bulk packing can be used. The tea is divided into large-leaf, medium-leaf, granules and tea dust.

Liters a technological term used in the pharmaceutical production of medicines. It is used for metal letters and numbers used to apply control information about the lot number of the product and the date of release and use of pharmaceutical and cosmetic products.
