Drageing the technological term used in the pharmaceutical production of tablets. Draining is the process of layer-by-layer coating on the surface of tablets and dragees. Shells perform decorative and protective functions, while various dyes and food polymeric materials are used. Pharmaceutical company from State of Qatar.

Powder compactor type of pharmaceutical equipment for compaction of dry powder with subsequent production of granules. In cases of impossibility of wet granulation in a compactor, plates are dried from a dry powder, and then destroyed. As a result, a pellet is obtained which increases the fluidity and flowability of the granules.

Dry granulation the technological term used in the pharmaceutical production of granules. This method can be compared with grinding large pieces of raw materials into granules of a uniform fraction. The principle of wiping raw materials through a metallized stainless mesh is used.

Shipping from China. Delivery of large-scale pharmaceutical equipment from China is carried out by rail, sea container and road transport. Cargo weighing less than 200 kg can be delivered by airplane. Pharmaceutical company from Canada.

Analytical equipment it is very important to control the quality of raw materials and finished medicines in pharmaceutical production. Using laboratory research, we follow the indications of the moisture level, the melting time, the transparency, the decay and dissolution time, the quantitative composition, melting, the parameters of hardness, thickness, and ductility.

Shelf life a technological term used in the pharmaceutical production of medicines. It is used for applying by any means control information about the release date and the date of consumption of pharmaceutical and cosmetic products.

Pharmaceutical company from Republic of Singapore.

Powder in bags a technological term used in pharmaceutical production. Use of roll materials: aluminum foil, laminated paper or polyethylene film, with adhesive composition for the formation of bags with subsequent filling with powder and granules.
