Screw capping the technological process of capping pharmaceutical products after placement in individual packaging. Plastic and aluminum caps for glass and plastic bottles and bottles are used.

Closure of vials the technological term used in the pharmaceutical production of liquid medicines. The equipment used automatically delivers bottles and clogs the neck of the bottle with rubber stoppers and aluminum caps, as well as screw caps.

Plastic tubes type of pharmaceutical packaging. Used for dispensing cream and ointments. After sealed sealing is a reliable container for storing and using cosmetic and medicinal products.

Condom packaging the technological process in the pharmaceutical production of medical products. Automatic process of layout in condom cells with subsequent packaging in metallized films, for individual and group packaging.

Tea Packaging a technological term used in pharmaceutical production and tea packaging. Various types of packaging materials are used for the weight and volume dosage of each package.

Vacuum conveyor type of pharmaceutical equipment. It is used for remote transfer of granular and powder raw materials from containers to bunkers of process equipment.

Logo on the capsule the technological process of marking in the pharmaceutical production of gelatin capsules. The manufacturer's logo is printed on the surface of the capsule by cold printing. At the same time, food colors and special equipment are used.

Packing of ampoules the technological process in the pharmaceutical production of drugs. Automatic process of forming cells in plastic or cardboard packaging with the filling of cells with glass ampoules with medicinal forms.

Tableting press type of pharmaceutical equipment. Used for testing industrial batches of tablets, by pressing in molds of tablet mass. In addition to laboratory presses, there is a large number of tableting equipment: rotary tableting presses, hydraulic and pneumatic models of tableting presses.

Self-adhesive labels a technological term used in pharmaceutical production. It is a roll material with a paper or plastic backing, an adhesive layer on one side, and an image printed on the other side of the printer.
