Stick a technological term used in pharmaceutical production. It is a roll material with a paper or plastic backing, an adhesive layer on one side, and an image printed on the other side of the printer.

Shipping from China. Delivery of large-scale pharmaceutical equipment from China is carried out by rail, sea container and road transport. Cargo weighing less than 200 kg can be delivered by airplane.

Dust separator type of pharmaceutical process equipment. It is used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses, as well as from the surface of hard gelatin capsules during encapsulation.

Packing in a blister pack the technological process in the pharmaceutical production of drugs. Automated process of formation of a cellular plastic package with the filling of cells with tablets, gelatin capsules or other dosage forms, followed by sealing with aluminum foil or cardboard.

Cream packaging the technological process of dispensing pharmaceutical products of plastic consistency into individual packaging. Used plastic and aluminum tubes, as well as glass and plastic containers.

Filling a technological term used in the pharmaceutical production of medicines. It is used by specialists with regard to the metered packing of liquids in various plastic and glass containers.

Granulator type of pharmaceutical equipment used for granulation of powder materials. The task of using a granulator in the formation of spherical strong granules.

According to the technological principle of operation, the granulators are divided into two groups: with the moisture of the powder and without humidification.

Tea bags the technological term used in the pharmaceutical production of tea bags. It is used by specialists with regard to batch dosing of tea in a special material in the form of sachets. There is bulk and weight packing in tea bags.

Liters a technological term used in the pharmaceutical production of medicines. It is used for metal letters and numbers used to apply control information about the lot number of the product and the date of release and use of pharmaceutical and cosmetic products.

Blister with tablets the type of packaging that maximizes the storage of tablets from powder from the effects of the environment. The main means of affecting the tablet is moisture. In the individual cells of the blisters, the tablets are maximally protected.
