Cellophane machine type of pharmaceutical packaging equipment. Used for wrapping cellophane film cartons to pharmaceutical and medicinal products. There are many types of similar equipment with different capacities.

Laboratory scales type of pharmaceutical laboratory equipment. Used for weight control of various pharmaceutical and medicinal raw materials. There are many models of scales with different weighing accuracy.

Granulate a technological term used in the pharmaceutical production of medicines. Spherical particles obtained by granulating powders. Granulate is used for tableting and filling hard gelatin capsules.

Cartoning machine type of pharmaceutical packaging equipment. Used packaging of various goods in cardboard boxes. In addition to embedding goods from cardboard machines, there is a function of the tab of paper instructions.

Packing in a box the technological process in pharmaceutical production. Automatic process of layout in ready-made cardboard boxes of various dosage forms and medical products.

Transparency Analyzer the type of laboratory equipment necessary to measure the transparency of food and technical gelatin. The device is equipped with highly stable light sources and sensitive photoelectric receivers for better test results.

Hardness analyzer type of laboratory pharmaceutical equipment for measuring the hardness of tablets and granules. The device is equipped with a high-precision sensor that monitors hardness and displays data on the front panel. Testing the hardness of tablets is continuous.

Sublimation the technological process in the pharmaceutical production of drugs. High-technological drying of liquid and solid materials, followed by preservation of the original structure in dried materials, physical and chemical characteristics, biological activity.

Freeze drying type of pharmaceutical process equipment. Used for the production of dehydration and drying of food, pharmaceutical and biological products. Moisture in a vacuum condenses and freezes. Vacuum drying allows you to rehydrate and restore the product by adding water.

Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings.
