Automatic equipment for weight control of packages with tablets, gelatin capsules or dragees Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Ointments packaging the technological process of dispensing pharmaceutical products of paste-like consistency into individual packaging. Use plastic and aluminum tubes, as well as glass and plastic containers.

Dry granulation the technological term used in the pharmaceutical production of granules. This method can be compared with grinding large pieces of raw materials into granules of a uniform fraction. The principle of wiping raw materials through a metallized stainless mesh is used.

Vibrating sieve type of pharmaceutical process equipment. It is used for the separation into fractions of various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities.

Cellophane machine type of pharmaceutical packaging equipment. Used for wrapping cellophane film cartons to pharmaceutical and medicinal products. There are many types of similar equipment with different capacities.

Mill type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities, hammer mills are most effective.

3D Mixer – type of pharmaceutical process equipment. Used for mixing loose powder pharmaceutical and biological products. The special design of the latest generation of powder mixers avoids dead zones when mixing.

Labeler type of pharmaceutical packaging equipment. Used for labeling in automatic and semi-automatic mode on pharmaceutical and medicinal products. There are many types of similar equipment with different capacities.

Catalog of equipment all technical information on pharmaceutical equipment is presented in electronic catalogs where the buyer can find photos, work videos, cost and delivery conditions. The catalogs systematize automatic lines and individual machines into groups using thematic headings.

Labeling the technological process of marking pharmaceutical products in the production of medicines. It is used on vials, bottles, boxes, ampoules with medicines. Labels are divided into self-adhesive and glue.

Powder in bags a technological term used in pharmaceutical production. Use of roll materials: aluminum foil, laminated paper or polyethylene film, with adhesive composition for the formation of bags with subsequent filling with powder and granules.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
