Manufacture of ointments the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.

Laboratory press type of pharmaceutical equipment. Used in laboratories for testing experimental batches of tablets, by pressing in molds of tablet mass. In addition to laboratory presses, there is a large amount of tablet equipment: rotary tablet presses, hydraulic and pneumatic models of tablet presses.

Composition Analyzer type of laboratory pharmaceutical equipment used to determine the composition of jelly in gelatin. The complex of devices consists of a gelatin analyzer, a constant temperature water tank and a capacitor.

PVC film type of packaging material for pharmaceutical blister equipment. Used in the formation of blisters for pharmaceutical and medicinal products. Colorless, transparent plastic, thermoplastic vinyl chloride polymer.

V-shaped mixer type of pharmaceutical process equipment. Used for mixing loose powder pharmaceutical and biological products. A special design feature of the powder mixer allows to avoid dead zones when mixing.

Screw capping the technological process of capping pharmaceutical products after placement in individual packaging. Plastic and aluminum caps for glass and plastic bottles and bottles are used.

Magnetic stirrer type of pharmaceutical laboratory equipment. Used for mixing liquid pharmaceutical and biological products in a laboratory. The special design of magnetic mixers avoids friction when mixing liquids.

Aluminium foil type of packaging material for pharmaceutical blister equipment. Used in the formation of blisters for pharmaceutical and medicinal products. Thin film of aluminum with a layer of thermo-weldable lacquer.

Powder packaging the technological process of batch dosing of pharmaceutical products in powder form in individual packaging. Used plastic and aluminum containers, as well as glass and plastic containers and other packaging that provides storage. Weighed and volumetric packing of powders is used.

Crusher type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities.
