Automatic packaging machine for group packaging of tablets in soft cell packaging Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Company CEO Mr. Roman Tsibulsky

Pharmaceutical company from Lao People's Democratic Republic.

Wet Granulation the technological process of the production of granules from powder materials, in which the raw material is moistened with various liquids. The best effect is obtained by moistening with gluing agents. There are models of granulators that simultaneously moisturize and granulate the powder. It is necessary to dry and powder the finished pellets.

Drageing boiler type of pharmaceutical process equipment. Used for the formation of multi-layered pellets, as well as for applying decorative and protective coating to the surface of tablets.

Coding machine type of pharmaceutical marking equipment. Used for printing and mechanical information about the release date and the expiration date on the pharmaceutical packaging of goods.

Capsule deduster type of pharmaceutical process equipment. Used to mechanically remove powder residues from the surface of hard gelatin capsules during capsulation.

Capsules type of pharmaceutical products. Capsules are formed using gelatin, which forms the walls of the shell. They are used for dosage of medicinal preparation in solid and liquid forms. Capsules are water-soluble.

Descaling tablets type of pharmaceutical process equipment. Used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses.

Production of creams the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.

Homogenizer type of pharmaceutical process equipment. Used for obtaining homogeneous mixtures of liquids and solids. The speeds of the knives of mechanical homogenizers can vary. There are models of laboratory and industrial applications.

Pharmaceutical vacuum cleaner type of pharmaceutical process equipment. Used to collect waste, in the form of dust, during tableting and encapsulation of powder materials. Often has the opportunity to reuse the collected powder.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
