Pills type of pharmaceutical products. Tablets are a solid dosage form. The process of producing tablets is pressing the powder using a tablet press. The composition of the tablets includes the active substance and various excipients. Classical forms of tablets are planocylindrical with a facet or hemispherical. At present, tablets can be of any shape and size, contain logos. Modern tablets are covered with protective covers. Blister with tablets the type of packaging that maximizes the storage of tablets from powder from the effects of the environment. The main means of affecting the tablet is moisture. In the individual cells of the blisters, the tablets are maximally protected. Blistering the technological process of packaging pharmaceutical products in durable individual packaging made of PVC and aluminum foil. Blister packs are formed during packaging heating, sterilizing at the same time. It is one of the popular types of full-fledged drug packaging.
