Packing machine for packing tea in filter paper bags with thread and label Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Liner to medicine a technological term used in the pharmaceutical production of medicines. It is used by specialists in relation to a paper sheet with information about the intended use, the way of application and the side effects of medicines.

Heat-sealable layer a technological term used in pharmaceutical production. Application of roll materials to the surface: aluminum foil, laminated paper or polyethylene film, layer with adhesive composition fixed by heating.

Production of creams the technological process of production of pharmaceutical products. Homogenization is the main technological component, using plastic and aluminum tubes for metered packaging of the resulting creams, ointments, pastes and gels in individual packaging.

Pharmaceutical pump type of pharmaceutical process equipment. Used to control the supply of liquid materials in the manufacture of drugs. Pumps can work with liquids and viscous pastes, gels, ointments.

Self-adhesive labels a technological term used in pharmaceutical production. It is a roll material with a paper or plastic backing, an adhesive layer on one side, and an image printed on the other side of the printer.

Sealing of ampoules technological process of sealing the neck of a glass ampoule after bottling of medicinal and chemical liquids. Automatic filling and sealing machines are used, as well as laboratory desktop ampoule machines.

Pharmaceutical sieve type of pharmaceutical process equipment. It is used for the separation into fractions of various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities.

Powder mixer type of pharmaceutical process equipment. Used for mixing loose powder pharmaceutical and biological products. A special design feature of the powder mixer allows to avoid dead zones when mixing.

Pressing the technological process of the production of tablets from powder materials, in which the raw material is compressed in the press forms of a tablet press. The best effect for pressing gives the introduction of a glue additive in the tablet composition. There is direct pressing and pre-pressing.

Mill type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities, hammer mills are most effective.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
