Packing machine type of pharmaceutical packaging equipment. Used for packaging of finished pharmaceutical products. Used in the composition of automatic lines in the final stage or separately. Models differ in the materials and performance used.

Vibrating sieve type of pharmaceutical process equipment. It is used for the separation into fractions of various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities.

Freeze-dried type of pharmaceutical process equipment. Used for the production of dehydration and drying of food, pharmaceutical and biological products. Moisture in a vacuum condenses and freezes. Vacuum drying allows you to rehydrate and restore the product by adding water.

Mixer for pharmaceuticals a technological term used in the pharmaceutical production of medicines. Used for all types of mixers for mixing loose powder and liquid pharmaceutical and cosmetic products.

Mill type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities, hammer mills are most effective.

Descaling tablets type of pharmaceutical process equipment. Used for mechanical removal of powder residues from the surface of tablets during tableting and pressing in rotary tablet presses.

Batch number a technological term used in the pharmaceutical production of medicines. Used for control information about the lot number of the product and the date of release and use of pharmaceutical and cosmetic products.

Water treatment a technological term used in the pharmaceutical production of medicines. Special means for water treatment used in production lines of medicine production. There are both separate lines and individual units.

Numerator type of pharmaceutical process equipment. Used for labeling pharmaceutical and biological products by printing or embossing information on cardboard, paper, foil.

Pharmaceutical sieve type of pharmaceutical process equipment. It is used for the separation into fractions of various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
