Liner to medicine a technological term used in the pharmaceutical production of medicines. It is used by specialists in relation to a paper sheet with information about the intended use, the way of application and the side effects of medicines.

Centrifuge type of pharmaceutical equipment for the removal of liquids in the production of drugs and raw materials. The work of the centrifuge is based on centrifugal forces, which, during rotation, remove liquid through a perforated drum.

Dragee the technological term used in the pharmaceutical production of tablets. Draining is the process of layer-by-layer coating on the surface of tablets and dragees.

Shells perform decorative and protective functions, while various dyes and food polymeric materials are used.

Hardness analyzer type of laboratory pharmaceutical equipment for measuring the hardness of tablets and granules. The device is equipped with a high-precision sensor that monitors hardness and displays data on the front panel. Testing the hardness of tablets is continuous. Pharmaceutical company from State of Israel.

Cream packaging the technological process of dispensing pharmaceutical products of plastic consistency into individual packaging. Used plastic and aluminum tubes, as well as glass and plastic containers.

Mill type of pharmaceutical process equipment. Used for grinding various pharmaceutical and medicinal raw materials. There are many types of similar equipment with different capacities, hammer mills are most effective.

Rotary tablet press type of pharmaceutical equipment. Used for the automatic production of tablets by pressing in molds of tablet mass. In addition to rotary tablet presses, there is a large amount of tablet equipment: laboratory tablet presses, hydraulic and pneumatic models of tablet presses.

Powder mixer type of pharmaceutical process equipment. Used for mixing loose powder pharmaceutical and biological products. A special design feature of the powder mixer allows to avoid dead zones when mixing.

Vacuum packaging the technological process of packaging pharmaceutical products by removing air from any containers. Used for plastic bags, glass and plastic bottles and bottles.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
