Tableting press type of pharmaceutical equipment. Used for testing industrial batches of tablets, by pressing in molds of tablet mass. In addition to laboratory presses, there is a large number of tableting equipment: rotary tableting presses, hydraulic and pneumatic models of tableting presses. Pressing the technological process of the production of tablets from powder materials, in which the raw material is compressed in the press forms of a tablet press. The best effect for pressing gives the introduction of a glue additive in the tablet composition. There is direct pressing and pre-pressing. Quality of tablets the technological term used in the pharmaceutical production of tablets. Ready-made tablets always go through several stages of preliminary testing, before mass production starts. Weight, thickness, strength, dissolution time, presence of damages and impurities are monitored.
