Automatic tablet and capsule packaging equipment in blisters in pharmaceutical production

Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Company CEO Mr. Roman Tsibulsky

Composition Analyzer type of laboratory pharmaceutical equipment used to determine the composition of jelly in gelatin. The complex of devices consists of a gelatin analyzer, a constant temperature water tank and a capacitor.

Tea bags the technological term used in the pharmaceutical production of tea bags. It is used by specialists with regard to batch dosing of tea in a special material in the form of sachets. There is bulk and weight packing in tea bags.

Blister production the process occurs in automatic and semi-automatic blister machines. Used roll materials PVC and aluminum foil. During heating on the PVC tape, cells are formed which are automatically filled with medicinal products, the finished blisters are sealed with aluminum foil on top. The foil is pre-applied with information about the products. The functions of the blister machine allow the application of the embossing method and the batch number.

Powder compactor type of pharmaceutical equipment for compaction of dry powder with subsequent production of granules. In cases of impossibility of wet granulation in a compactor, plates are dried from a dry powder, and then destroyed. As a result, a pellet is obtained which increases the fluidity and flowability of the granules.

Bottles a technological term used in pharmaceutical production. Individual containers in the form of bottles and containers of various shapes from plastic and glass intended for filling with tablets, granules, capsules or dragees.

Stick a technological term used in pharmaceutical production. It is a roll material with a paper or plastic backing, an adhesive layer on one side, and an image printed on the other side of the printer.

Blister with tablets the type of packaging that maximizes the storage of tablets from powder from the effects of the environment. The main means of affecting the tablet is moisture. In the individual cells of the blisters, the tablets are maximally protected.

Magnetic stirrer type of pharmaceutical laboratory equipment. Used for mixing liquid pharmaceutical and biological products in a laboratory. The special design of magnetic mixers avoids friction when mixing liquids.

Packaging of tea the technological process of dosed tea packing into group and individual packaging. For various types of tea, weight or bulk packing can be used. The tea is

divided into large-leaf, medium-leaf, granules and tea dust.

Laboratory equipment table devices and machines for research and measurement purposes. And also for testing and analytical work. It is widely used in the pharmaceutical industry to develop technology in the production of pilot batches of medicinal products.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
