Automatic transporter scales for dose control high weight pharmaceutical products

Pharmaceutical company from Republic of Uzbekistan.

Assembly line type of pharmaceutical auxiliary equipment. It is used in conveyors for the remote transfer of granular and powder raw materials from containers to bunkers of process equipment.

Laboratory scales type of pharmaceutical laboratory equipment. Used for weight control of various pharmaceutical and medicinal raw materials. There are many models of scales with different weighing accuracy.

Manufacture of medicines a technological term used in the pharmaceutical production of medicines. Suitable for all types of solid and liquid forms of medicines and possible ways of their release

Dragee machines type of pharmaceutical process equipment. Used for the formation of multi-layered pellets, as well as for applying decorative and protective coating to the surface of tablets.

Pump dispenser type of pharmaceutical process equipment. Used for dosed supply of liquid materials in the manufacture of drugs. Dosers can work with liquids and viscous pastes, gels, ointments.

Pharmaceutical company from Oriental Republic of Uruguay.

Aluminium foil type of packaging material for pharmaceutical blister equipment. Used in the formation of blisters for pharmaceutical and medicinal products. Thin film of aluminum with a layer of thermo-weldable lacquer.

Quality of tablets the technological term used in the pharmaceutical production of tablets. Ready-made tablets always go through several stages of preliminary testing, before mass production starts. Weight, thickness, strength, dissolution time, presence of damages and impurities are monitored.

Freeze-dried type of pharmaceutical process equipment. Used for the production of dehydration and drying of food, pharmaceutical and biological products. Moisture in a vacuum condenses and freezes. Vacuum drying allows you to rehydrate and restore the product by adding water.
