Tube-filling machine for automatic cream filling of plastic tubes Pharma-Manager.com Online video of production and laboratory equipment from leading manufacturers and suppliers of pharmaceutical industry.

OUR KEYWORDS: Equipment, catalog, pharmaceutical, technology, manufacturing, laboratory, GMP, news, pharmaceuticals, products, industry, plant, design, clean rooms, gelatine capsule, vial, ampoule, tube, cap, capping, labeler, labeller, machine, tablet, press, tabletpress, pharma, filling, dispenser, pharma, packing, blister, marker, labeling, printer, application, manual, capsule filling, capsule filler, sale, buy, photo, characteristics, sell, soldering, sealer, powder, granules, liquid, solid, soft, dry.

Our visitors will be able to see all processes how it is done. We also help you choose different kinds of pharmaceutical equipment – laboratory tablet press, rotary tablet press, hydraulic press, granulators, mixers, drying, vacuum powder conveyor, blistering machines, packaging machines, capsule filling machines and many other kinds of equipment. Our consultants will help with the discussion, selection, payment, and delivery of pharmaceutical equipment to your city. For over 17 years we have been working in this industry for our customers.

Company CEO Mr. Roman Tsibulsky

Dragee type of pharmaceutical and food products. Dragee is formed in drageeing boilers. On the granulated sugar, various liquid materials are applied by spraying, followed by drying with hot air, if necessary, dry powder is applied to the forming dragees. Forming the dragee shell allows you to adjust the size and color of the shell.

Filling machine type of pharmaceutical process equipment. Used for automatic dosing and batch filling of plastic and glass bottles with liquid pharmaceutical and biological products.

Pharmaceutical company from New Zealand.

Granulation of powders the technological process in the pharmaceutical production of drugs. There are two basic needs for granulation, where the pellets are the final product or granulation improve the flowability of the powder in the process. The decision on the need for granulation is taken when it is not possible to use powders with a larger fraction.

Analytical equipment it is very important to control the quality of raw materials and finished medicines in pharmaceutical production. Using laboratory research, we follow the indications of the moisture level, the melting time, the transparency, the decay and dissolution time, the quantitative composition, melting, the parameters of hardness, thickness, and ductility.

Plastic tubes type of pharmaceutical packaging. Used for dispensing cream and ointments. After sealed sealing is a reliable container for storing and using cosmetic and medicinal products.

Coding machine type of pharmaceutical marking equipment. Used for printing and mechanical information about the release date and the expiration date on the pharmaceutical packaging of goods.

Pharmaceutical company from Kingdom of the Netherlands.

The fluidized bed a technological term used in the pharmaceutical industry. It refers to the process of granulation in a fluidized bed, represents a mixture of liquid and powder, resulting in perfectly spherical granules. The fluidized bed is the best way to create a multilayer pellet.

Bottles a technological term used in pharmaceutical production. Individual containers in the form of bottles and containers of various shapes from plastic and glass intended for filling with tablets, granules, capsules or dragees.

OUR CATALOG OF PHARMACEUTICAL EQUIPMENT: Equipment for preparation and transportation of tablet mass; Early boring and product feeding equipment; Centrifuge Sieve; Vibrating sieve for sieving powders and granules; Cone Pharmaceutical Mills; Pharmaceutical hammer mills; Pellet mixers for industrial production; Fluid Bed Pellet Dryers; Bins for storing tablets, powders and pellets; Bin mixers for powders and granules; Laboratory pharmaceutical equipment; Industrial equipment for medicine production; Lifting columns for containers; Bottle and vial washing; Semi-automatic bottle and vial washer; Automatic Bottle Washing; Tablet presses for tablet pressing; Laboratory rotary tablet press; Laboratory rotary tablet press; Compact rotary tablet press; Washable rotary tablet press; Washable rotary tablet press; Rotary tablet press for powder pressing; Press tool for tablet equipment; Coater for the application of the shell on the tablets; Container washing and sterilization equipment; Semi-automatic bottle washing machine for syringe washing; Automatic washing and drying machine for ampoules, vials and cartridges; A pyrogenic tunnel for sterilization of ampoules, vials, cartridges; Powder filling and dispensing lines; Liquid solution bottling and powder dispensing machines; Bottling machine for products with low viscosity; Bottling machine and double capping bottles; Sunset Machine for Vials of Different Forms; Bottling and capping machine for ophthalmic products; Glass bottle filling and capping machine; Plastic Bottle Closing Machine; Bottling machine in glass ampoules and penicillin bottles; Filling machines in plastic syringes and cartridges; Bottling machine in vials, syringes and cartridges; Syringe and cartridge filling machine; Filling in plastic bags and bottles; Infusion Packaging Machine; Bottling machine for ready-made infusion bags; Line for forming containers from granules, with subsequent filling and capping; Filling and capping machine for PE and PP bottles; Dispersion into plastic bottles and vials; Inspection equipment for drug testing; Inspection machine for glass ampoules and penicillin bottles; Inspection machine for syringes and cartridges; Inspection machine for infusion packs; Inspection machine for large glass and plastic bottles; Carton machines for blisters and tubes packaging; Automatic drug cartridge machine; Vertical cardboard machine; Horizontal cardboard machine; Folding machine.
